Consult a physician. Show this safety data sheet to the doctor in attendance.

If inhaled: Inhalation of any component in this kit is unlikely. If a component of this kit is inhaled and causes discomfort, move exposed individual to fresh air. Seek medical attention if breathing is difficult or symptoms persist.

In case of skin contact: The Sample Extraction Buffer is not likely to be hazardous by skin contact. However, in case of contact, immediately clean skin with plenty of water. Remove contaminated clothing and shoes. Cold water may be used. Wash clothing before reuse. Thoroughly clean shoes before reuse. The animal proteins and dried reagents absorbed into the nitrocellulose membrane and the fibre conjugate pad are very unlikely to be hazardous by skin contact, but cleaning the skin after use is advisable.

If swallowed: Ingestion of small amounts of the Sample Extraction Buffer should not be toxic, however, a physician should be consulted immediately. The animal proteins and dried reagents absorbed into the nitrocellulose membrane and the fibre conjugate pad are very unlikely to be ingested or be hazardous by ingestion. However, a physician should be consulted should ingestion occur.

In case of eye contact: The test device is very unlikely to come into contact with the eye, however, a physician should be consulted should contact occur. In case of contact with the Sample Extraction Buffer, immediately flush eyes with plenty of water for at least 15 minutes. Cold water may be used. Get medical attention.

Aggravating Condition: Repeated or prolonged exposure is not known to aggravate medical conditions.
